

Fraser-Volpe

STEDI-EYE BYLITE

Stabilized Binocular

Optical Performance . . . Engineered Solutions

The Bylite is Fraser-Volpe's lightweight gyro stabilized binocular that enables the user to view people and events from any mobile platform. The Bylite provides a rugged, lightweight, mission critical surveillance device. The Bylite removes up to 98% of image motion caused by hand tremor and platform vibration, providing exceptional viewing from all types of moving vessels, aircraft, and vehicles.

FEATURES

- *14 Power Magnification*
- *Gyro Stabilized*
- *Up to 98% Reduction of Image Motion*
- *100% Sealed, Submersible and Waterproof*

BENEFITS

- *Unsurpassed Resolution* (4.3 ARC Seconds)
- *Highest Scan Rate Available* (8 degrees/Second)
- *Greater Field of View* (4.3 degrees)
- *Operates Continuously* 8 hours on (1) CR-123 Battery
- *Lightweight* (2.8 lbs.)
- *Buoyant*

Fraser-Volpe is a recognized leader in active-image optical stabilization. Since 1972, our products have provided advanced optical performance to law enforcement, government agencies, and military worldwide. Our products are engineered to withstand the most demanding field conditions.
