- 100% Sealed, Submersible & Waterproof
- Continuous Operation for 12 hrs on 2 "AA" Batteries

Fraser-Volpe pioneered the first generation of active image stabilized binoculars. For over 35 years, our products have set the standard for durable, high quality optical instruments utilized by Law Enforcement Organizations and Military Agencies worldwide.

Stabilized viewing on the water is essential. The STEDI-EYE® Mariner removes up to 98% of image motion caused by hand tremor and platform vibration, for exceptional viewing in the air, on land or at sea. Our STEDI-EYE® Mariner is built to the same standards as our M25 Military model and has proven to consistently endure demanding field conditions. Every binocular that leaves our facility must pass the same rigorous quality standards to ensure our customers receive the most reliable gyro stabilized binocular in the industry.

For the best quality, durability, and optic performance, depend on STEDI-EYE® Mariner – the choice of professionals.
